

# Bank of Israel plans, and recent innovations around supervisory data

Noa Granot Reich | Bank of Israel

28<sup>th</sup> Eurofiling Conference, June 2023

2017

**xBRL™**  
THE BUSINESS REPORTING STANDARD

# Good, but not perfect

Fear of change + complexity

DATA is used as in 2005

Frequent revisions in the model

Difficult to connect DP between versions

No tools for data integration

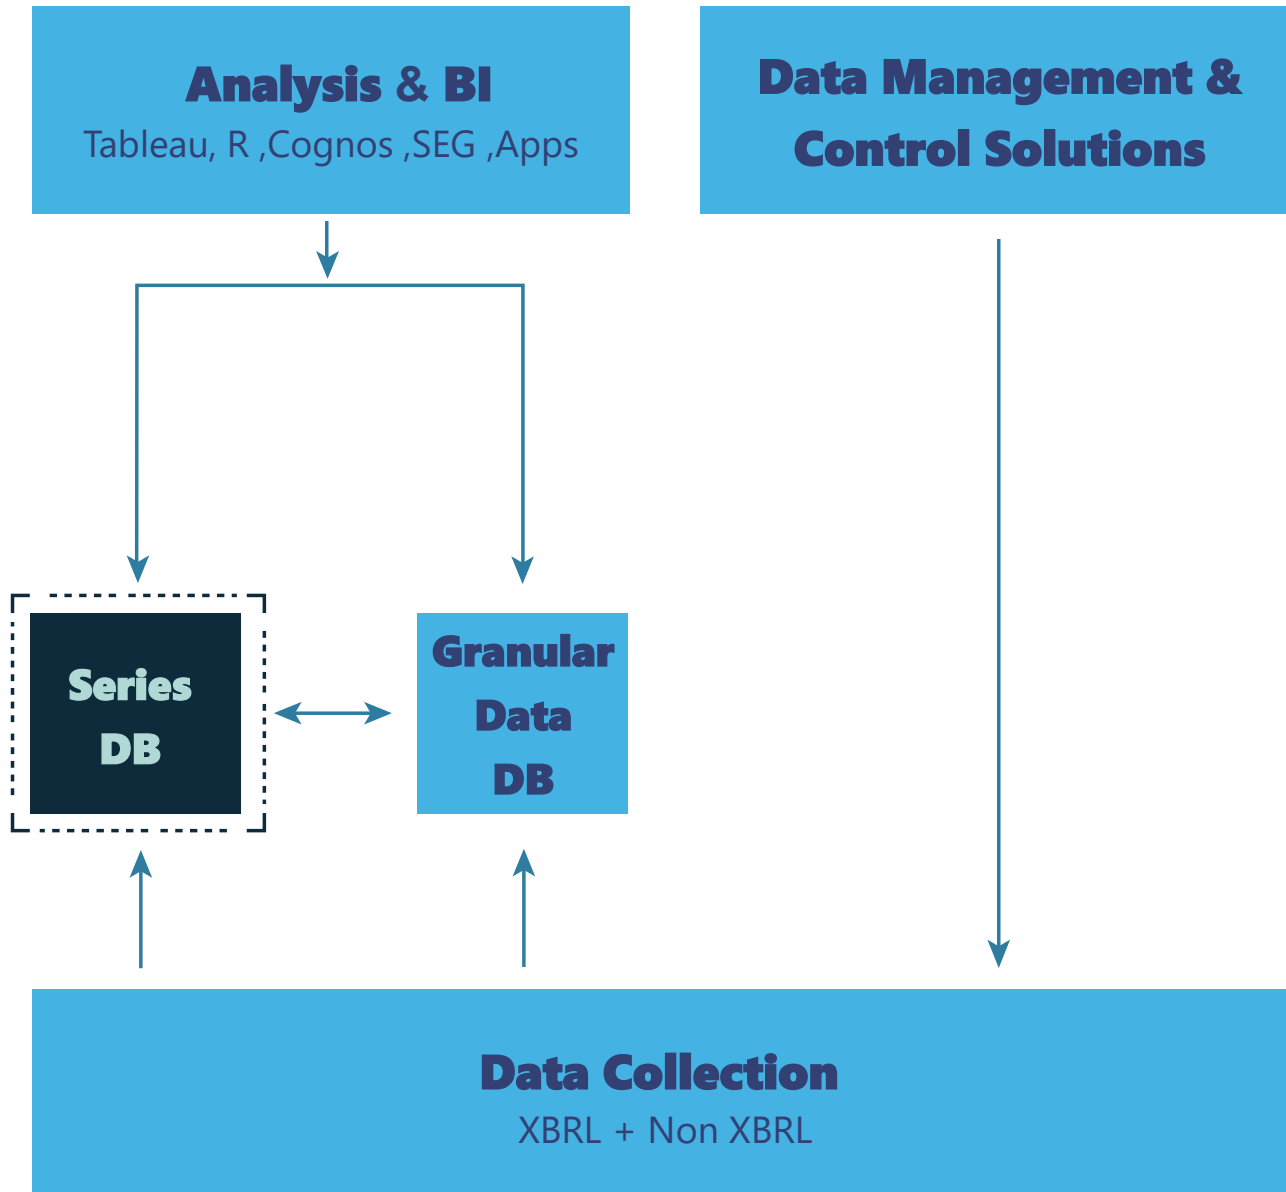

Calculated indices - are not handled or  
stored in one place

# What do we do to create change?

# Architecture of the Solution

# Time Series DB Evolution

Connecting series

Integration with the corporate information

Calculated series

Accessibility - BI tools, the BOI's website

Series over granular data

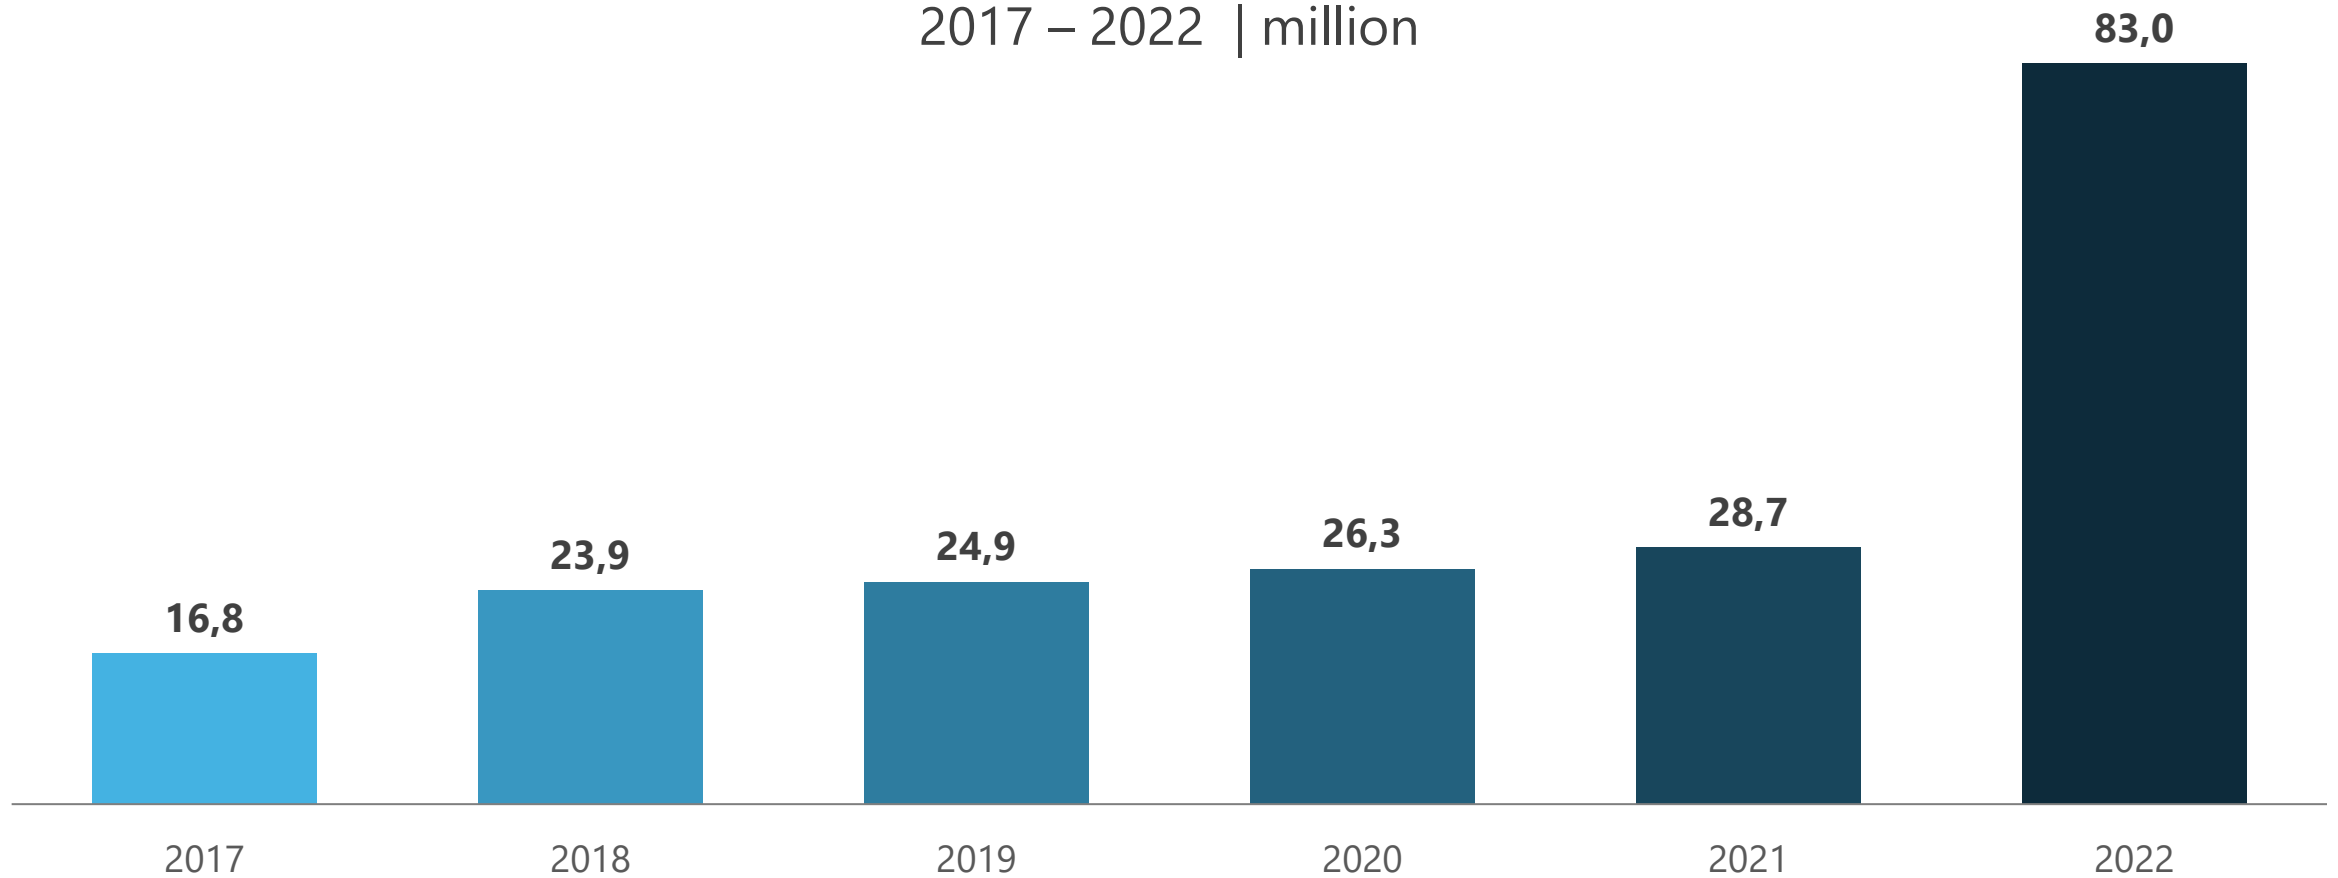

Using and Leveraging the data model

# Increasing Demand for Data

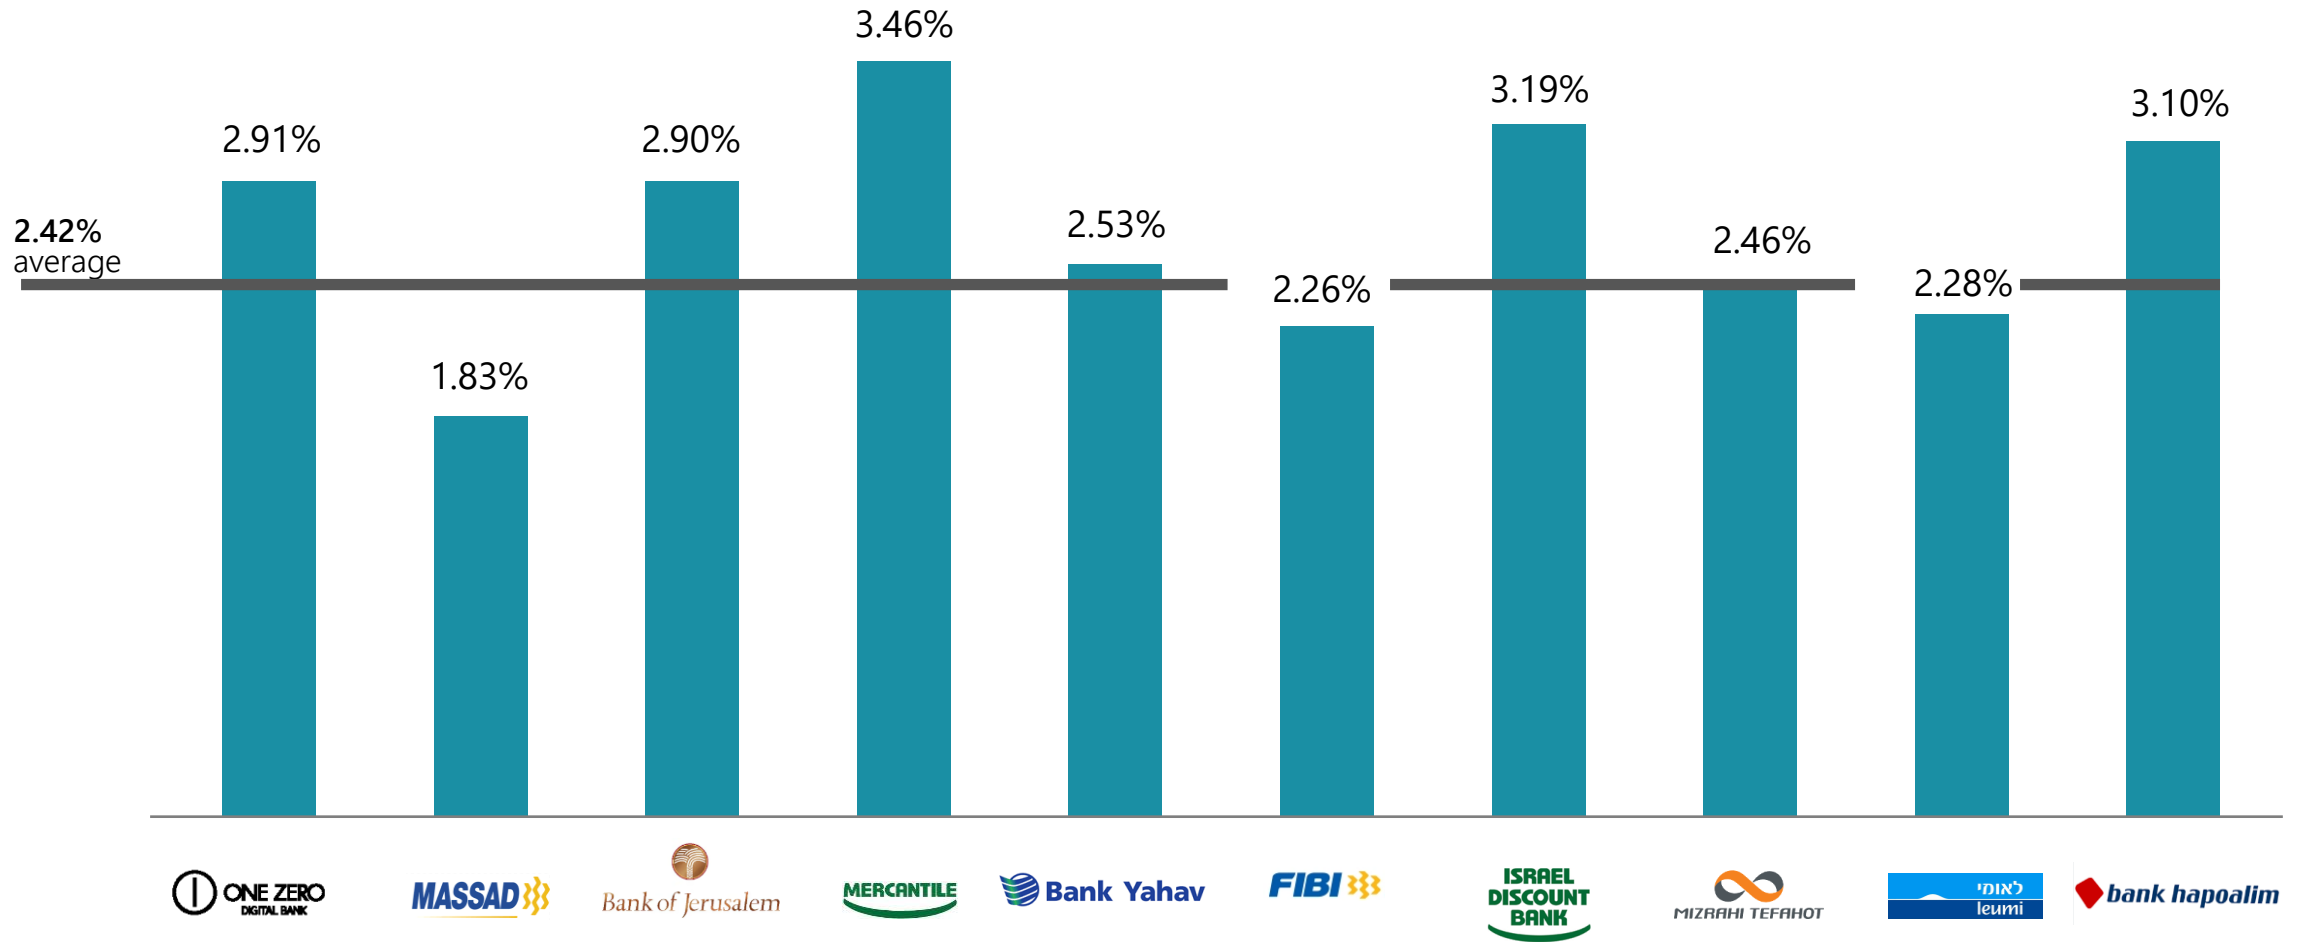

## Number of Data Items Reported via XBRL

2017 – 2022 | million

# Bank of Israel Website

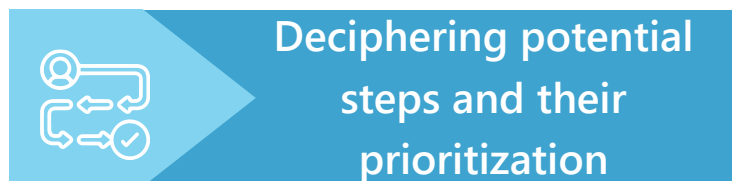

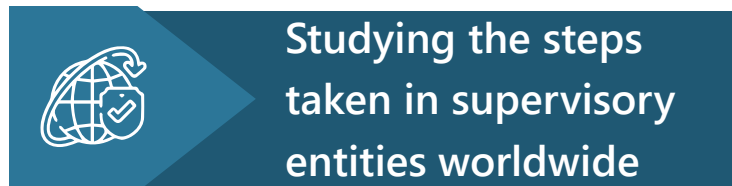

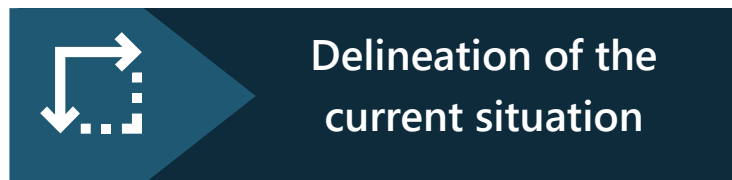

Average interest on deposits for a period of up to one month, April 2023

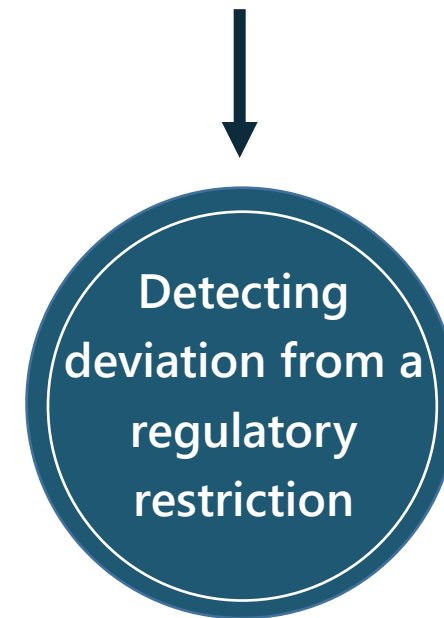

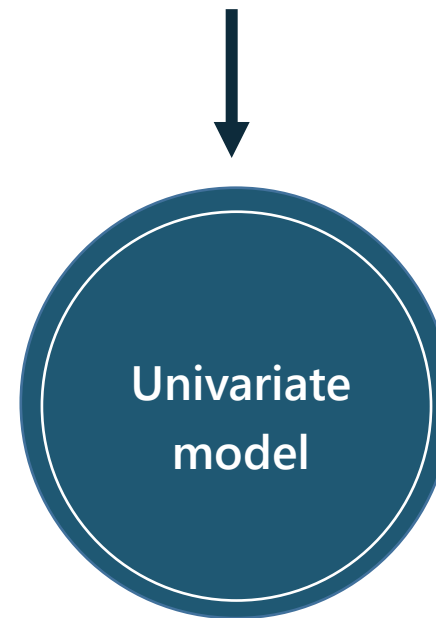

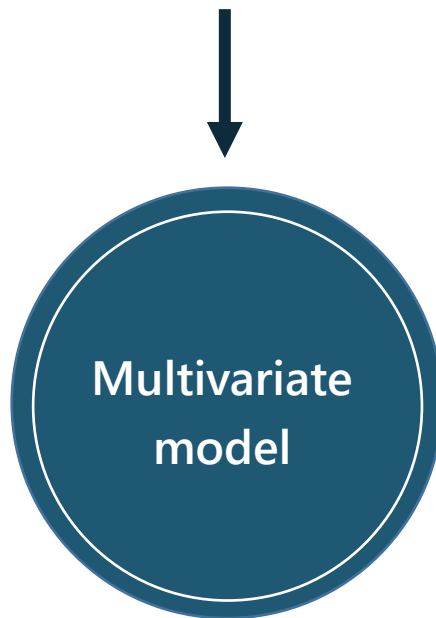

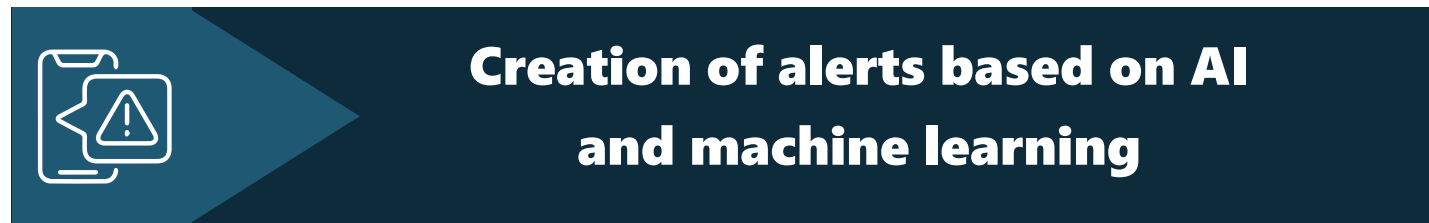

# SupTech

## SupTech Data Strategy

## Selected projects for implementation

# There is still a long way to go

**What have  
we already  
done?**

**What else  
is left to do?**

**Thank you!**
