

**Leveraging AI
for Effective
and efficient
digital reporting**

Semansys Technologies

Regulatory requirements demand corporates to provide standardized data

WHY

Data comes from all types of tools and different departments.

HOW

Micro Data warehousing ensures security and flexibility and is technically schemeless.

WHAT

AI collects Taxonomy data and AI Virtual agents tag, evaluate, and present data.

SWOT <in short>

STRONG

AI language models ready for the challenge at hand. Reporting expertise is available, structuring unstructured data available.

WEAK

A needed proof of concept in a live environment together with paying customers/ early adaptor.

TREAT

Market adoption is needed for launching end Q4 2023. Most companies see AI as a US gimmick and not a solution.

OPPORTUNITY

No more challenges but focus on open datafields, realizing more insights while reducing human activities.

WORKFLOW

SETTING AI TO WORK

Collecting data in a clever way, ensuring safety and consistency.

DATA WAREHOUSE

Dedicated
Micro
solutions

VIRTUAL AGENT

Data import
and
recovery

SEMANTIC TAGGING

Tagging
data to a
taxonomy

PRESENT & CHECK

Virtual
overview of
datasets

START XBRL

Create and
validate
instances
