

Immutable ESG reporting with
transparent audit and compliance proofs

powered by

*“Doing good isn’t good enough.
You’ve got to prove you are doing
good...”*

Andrew Dunnett
(Group Director, Vodafone)

Corporations are in need of
auditable sustainability reports.

50,000
Companies

and thousands of suppliers and lenders

New regulations require companies to provide precisely defined key figures throughout **their entire value chain** in sustainability reports, **subject to external audit**, to make information comparable to financial reporting.²

Reporting Compliance

Thousands of companies will be impacted in 2024 by CSRD reporting obligations.

Our Solution

**Comprehensive
multi-framework platform**

RESPONSIVE

USER-FRIENDLY

IMMUTABLE

Mastered sustainability data and
evidence feeds multiple global
reporting standards

It's time to prove it

Arivu creates **digital twins** of change histories for **audit and compliance proof**

Proof that work was done, by whom and when

- System user logs and workflow progress

Proof that a data point or record changed

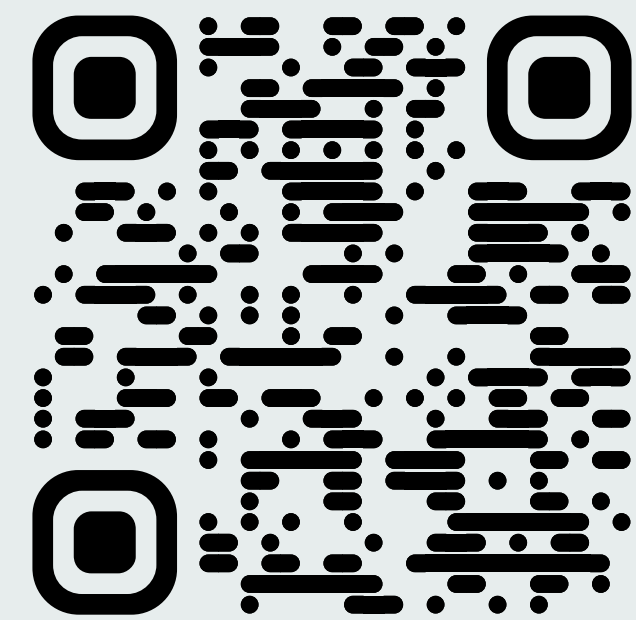

- Application data and KPIs
- Value change or material threshold trigger

Proof that supporting evidence has changed

- Document, image or data set fresh

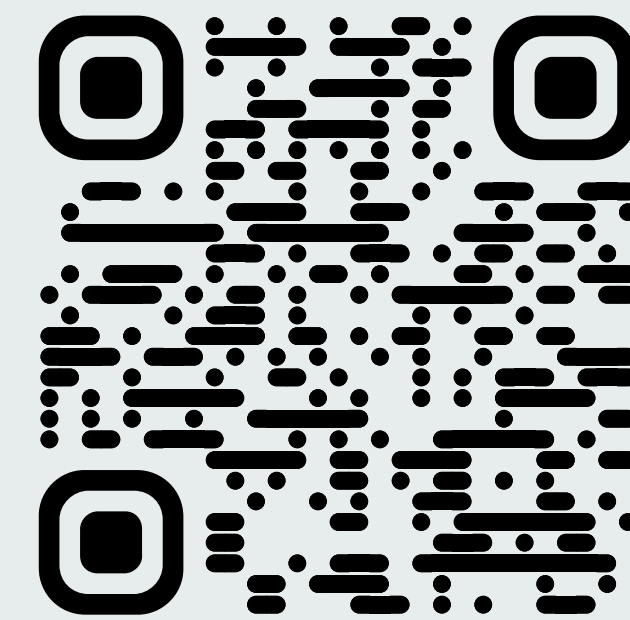

A single golden-source, easy-to-share, blockchain-verified compliance story
